Applying to the STaRS Program

**Step 1: Complete web application**
If a position a student is interested in is open, he/she must submit an application (available in the Jobs section). The application will ask the student candidate to describe his/her technology experience, include a resume, and list job availability. Alternatively if there are no open positions or the position the student is interested in isn't currently open, an application should be submitted to be kept on file.

**Step 2: Schedule an interview**
After completing the application, the student’s information will be evaluated by STaRS staff, and the candidate may be called to interview with the hiring department for the position.

**Step 3: Prepare for and completing the interview (business casual attire)**
During the interview process, students will be evaluated based on the criteria listed in the job description. Several jobs within the STaRS Program are competitive; it is possible there will several students interviewing for a position.

**Step 4: Follow-up after the interview**
After the interview, the candidate will be contacted with an employment decision. If not offered the position for which he/she applied, STaRS will keep the candidate’s application and resume on file for future job opportunities.
